

KasiFlow

The business app for the spaza shop and the builder: a credit book, stock orders from the suppliers they already use, and a record that proves the business is real. Suppliers are loaded through our integration and accept PayFast, cash, or both.

WHO

Spaza owners first, builders second.
Any informal trader can use a tool that fits.

NAVIGATION

Top bar: the business and alerts.
Bottom bar: Home · Account · Suppliers
· More.

MONEY

PayFast pays the supplier directly.
Cash is confirmed by both sides and sealed.

THIS DOCUMENT

9 flows, 20 pages, ~50 screens. A direction to react to, not a final spec.

Design language

Calm, premium and readable in bright sun on a R1,500 phone. Money is the hero; everything else steps back.

KasiFlow

Colour

Ink blue · #1F2A44

Primary, hero cards, main buttons

Marigold · #F4C56A / #C98A1B

Attention: due today, pay cash, on its way

Jade · #1E7A5A

Confirmed, paid, safe

Garnet · #B3383B

Mismatch, dispute, delete. Used rarely.

Porcelain · #F6F3EE

Background. Warm, not clinical white.

Line · #E7E1D7

Borders and dividers

Type

R2,340

Fraunces 600 · money and big numbers

Confirmed by both

Fraunces 600 · screen titles, moments

Mahlangu Wholesale

Plus Jakarta Sans 700 · names, buttons

Delivers tomorrow, 8:00–12:00

Plus Jakarta Sans 400 · supporting text

Rules

- **One number leads each screen.** Everything else is smaller.
- **Big targets:** buttons 50 px high, keypads 48 px.
- **Colour means something:** marigold needs you, jade is done, garnet is a problem.
- **Never a dead end:** every empty, offline and error state says what to do next.
- **Say what's private** wherever people type something personal.
- **Offline is normal:** "saved on your phone" beats a spinner.
- **Photos are placeholders** here; real product photos come from the supplier data.

Primary action

Secondary

Due today

Paid

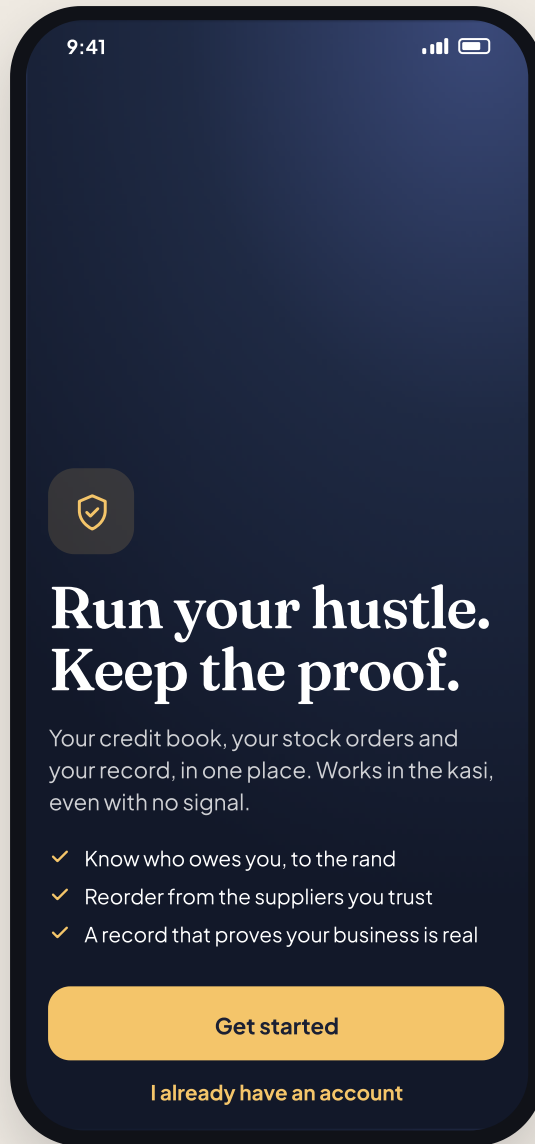

PayFast

Not started

Getting started

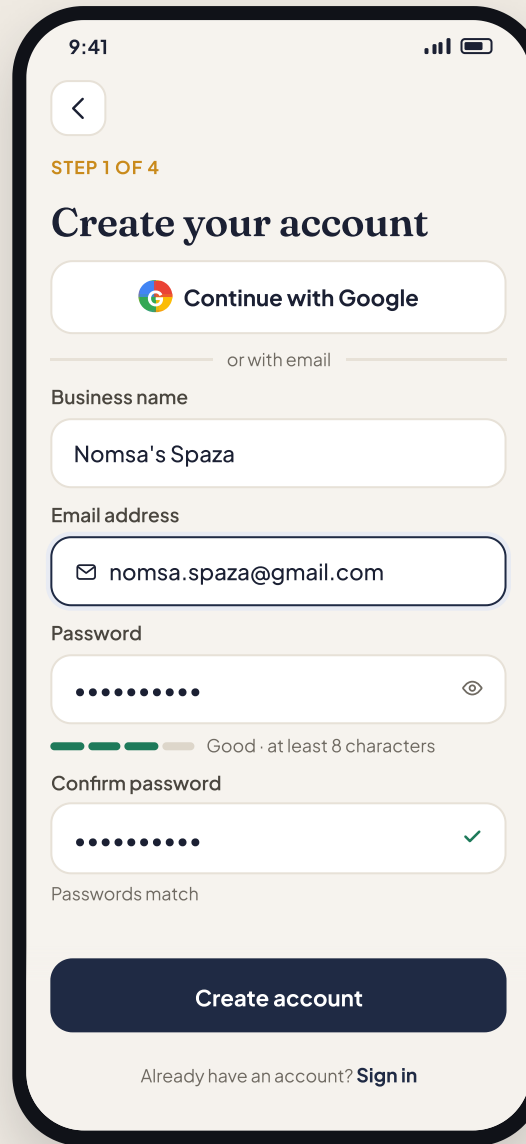

Business name, email and password first. The email is verified before anything else.

KasiFlow

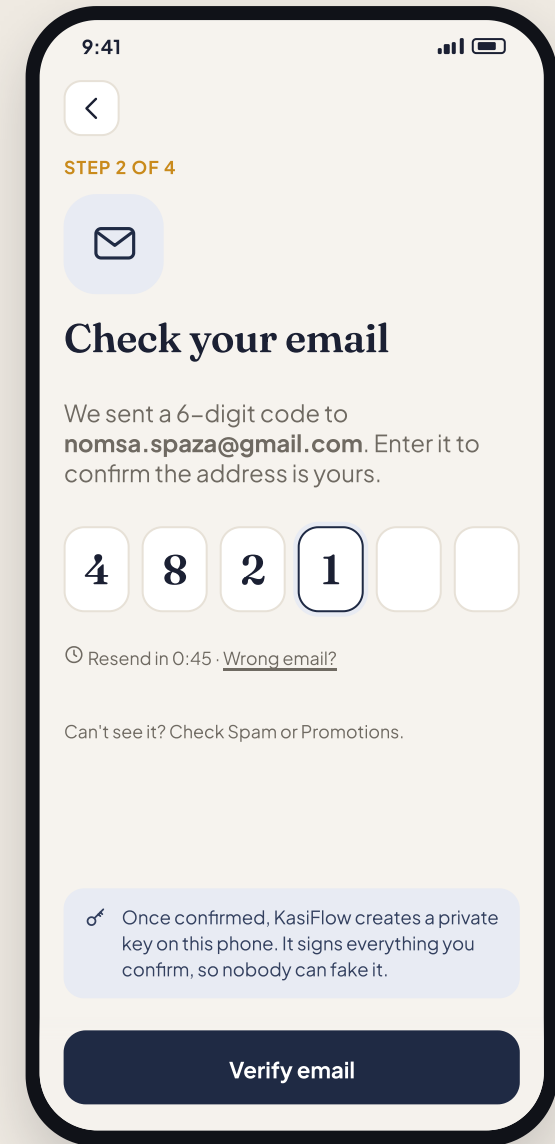

Welcome

One promise, three reasons. Deep ink hero; the only screen with a full-bleed background.

Create account

Continue with Google, or business name, email, password, confirm. No SMS.

Verify email

A 6-digit code by email. Nothing else happens until the address is confirmed.

Getting started (cont.)

9:41

STEP 3 OF 4

What kind of business do you run?

We'll set up the right tools. You can change them any time.

- ☒ **Spaza / shop**
Stock, credit, reorders
- ☐ **Builder / trade**
Jobs, stages, client sign-off
- ☐ **Another hustle**
Start with the basics, add tools later

✓ Email confirmed

Continue

Business type

Only after the email is verified. Sets default tools and Home, never locks anything.

9:41

STEP 4 OF 4

About your spaza

Your name

Nomsa Dlamini

Area

Tembisa, Ekurhuleni

Suppliers use this to show you who delivers to you.

Cellphone (optional)

082 123 4567

Only for WhatsApp receipts and delivery calls. Not for signing in.

Only your business name and area are visible to suppliers. Your books stay private.

Continue

About the business

Your name and area. Cellphone optional, never used to sign in.

9:41

Your tools

We picked these for a spaza. Turn any on or off.

- ☒ **Credit book**
Who owes you, and when they pay
- ☒ **Order stock**
Reorder from your suppliers
- ☒ **My record**
Always on. It's yours.
- ☐ **Jobs**
For builders and trades
- ☐ **Daily tally**
Coming soon

Soon

Open my spaza

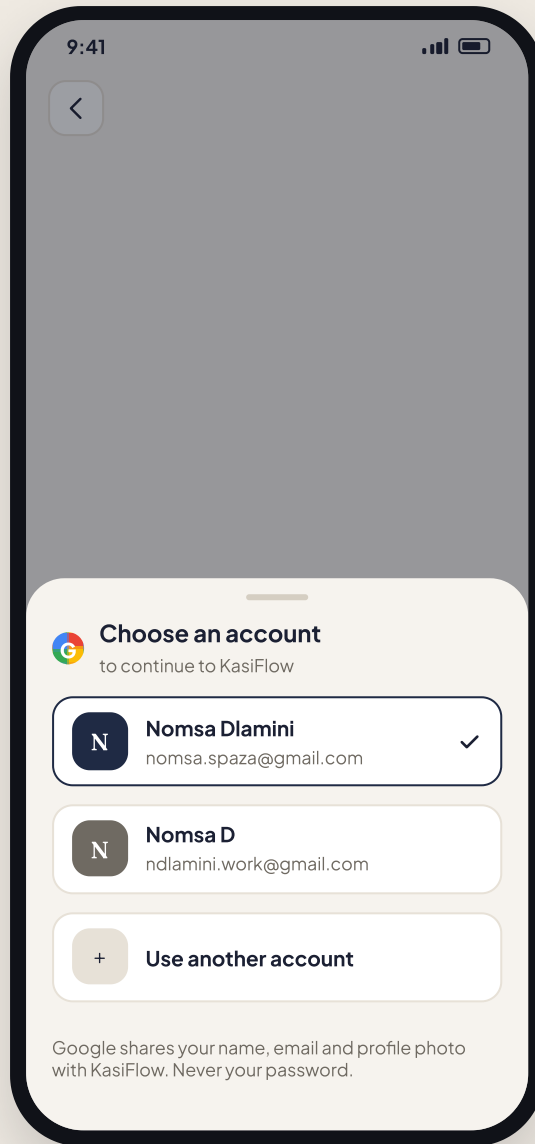

Pick your tools

Pre-picked for a spaza. My record is always on.

Continue with Google

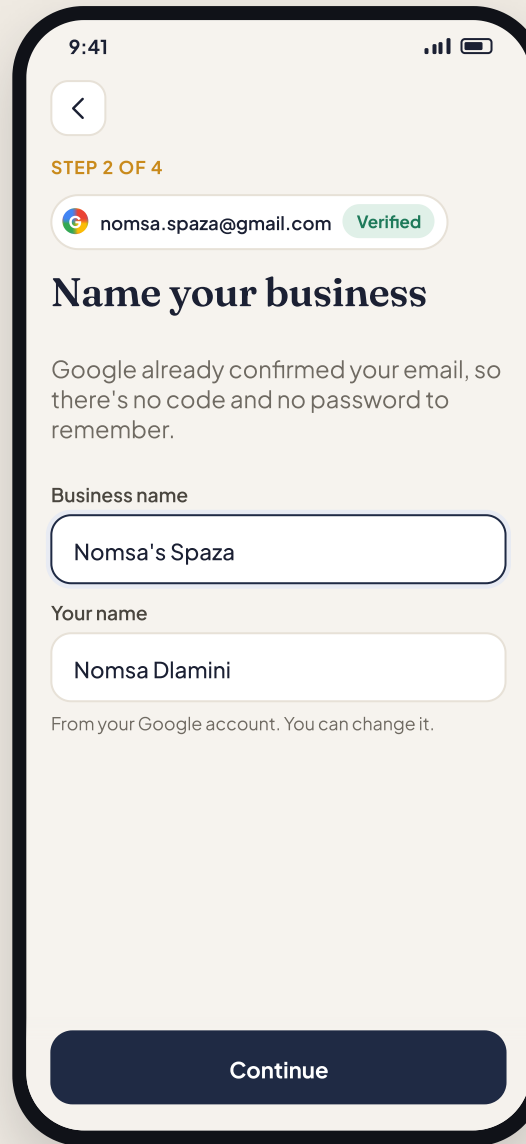

One tap instead of a password. Google has already verified the email.

KasiFlow

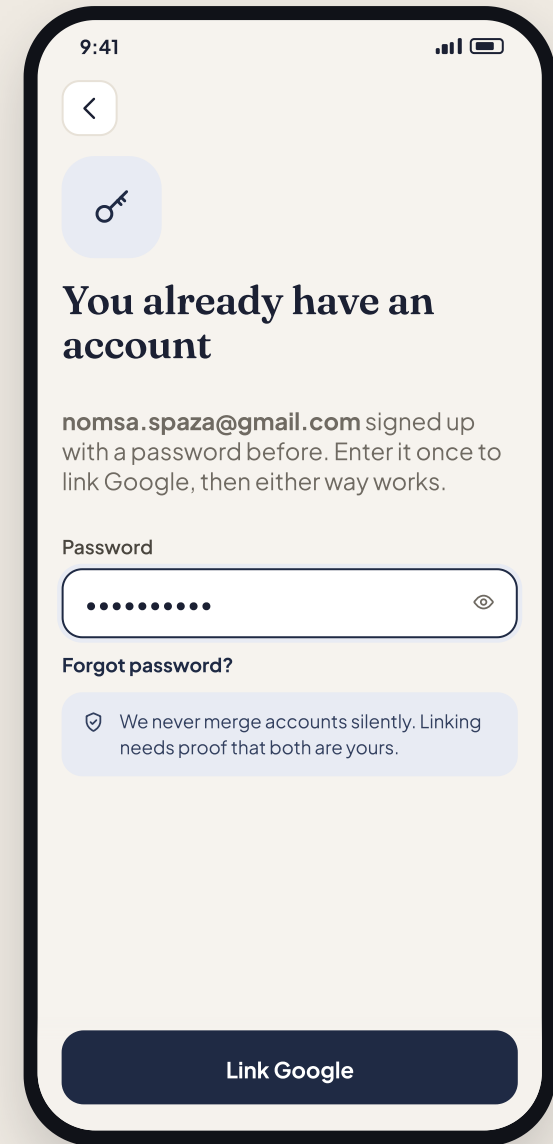

Choose a Google account

Android's own account picker. KasiFlow gets name, email and photo, never the password.

Name your business

Skips the password and the email code, then joins the normal steps: business type, area, tools.

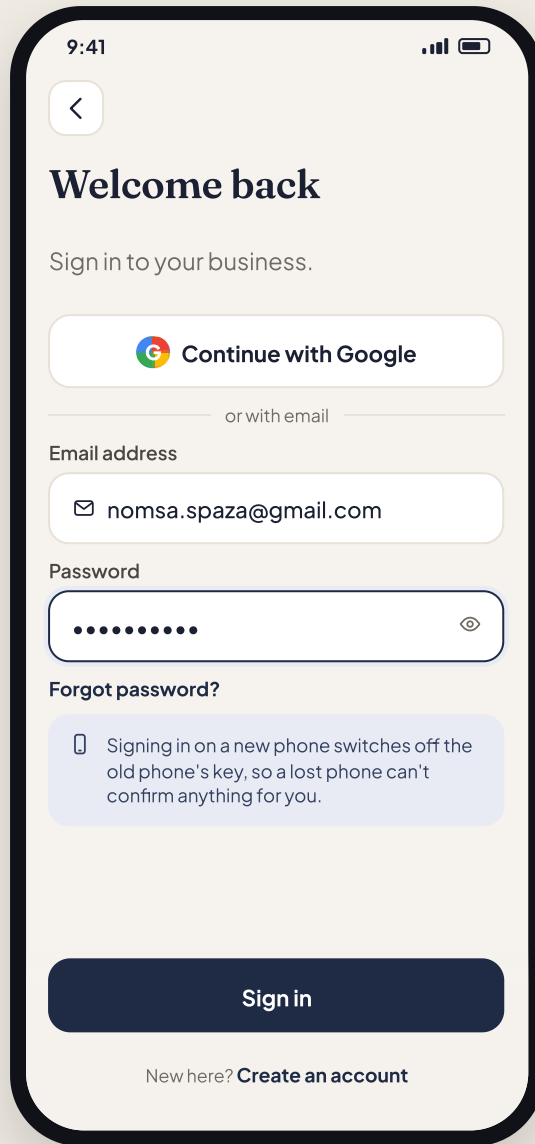

Email already registered

If the email signed up with a password before, prove it once to link Google. Never merged silently.

Signing back in

Email and password or Google, with a safe reset.

KasiFlow

9:41

<

Welcome back

Sign in to your business.

 Continue with Google

or with email

Email address

 nomsa.spaza@gmail.com

Password

..... 

Forgot password?

 Signing in on a new phone switches off the old phone's key, so a lost phone can't confirm anything for you.

Sign in

New here? [Create an account](#)

Sign in

Google or email and password. A new phone gets a new signing key; the old one stops working.

9:41

<

Reset your password

Enter your email and we'll send a link to choose a new password.

Email address

 nomsa.spaza@gmail.com

 For your safety we say the same thing whether or not the email has an account.

Send reset link

Forgot password

Same answer whether or not the email exists, so nobody can fish for accounts.

9:41

Check your email

If there's an account for nomsa.spaza@gmail.com, a reset link is on its way. It works once and expires in 30 minutes.

Open email app

Back to sign in

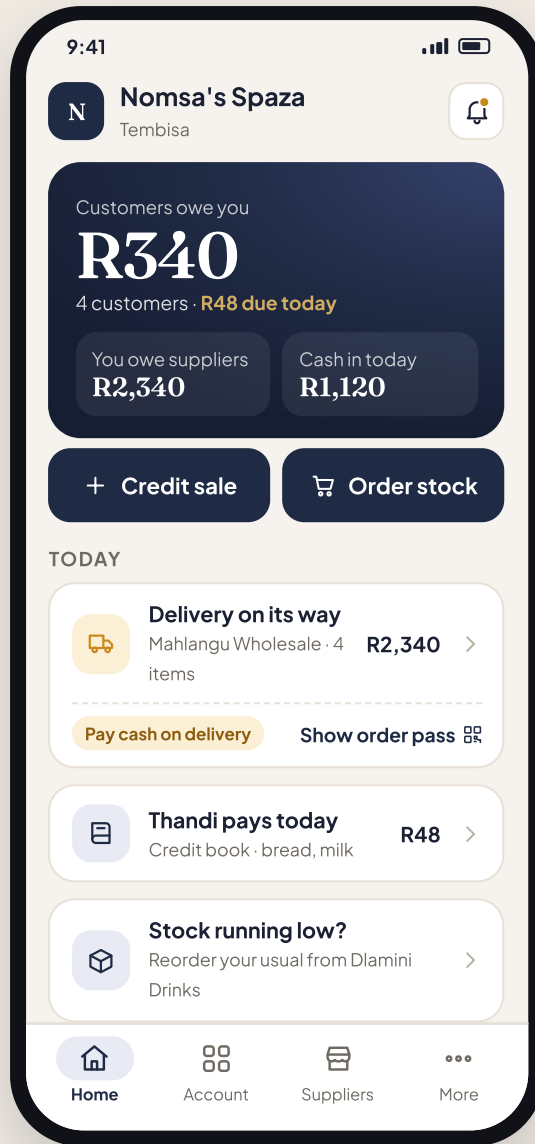

Reset link sent

One use, 30 minutes.

Home

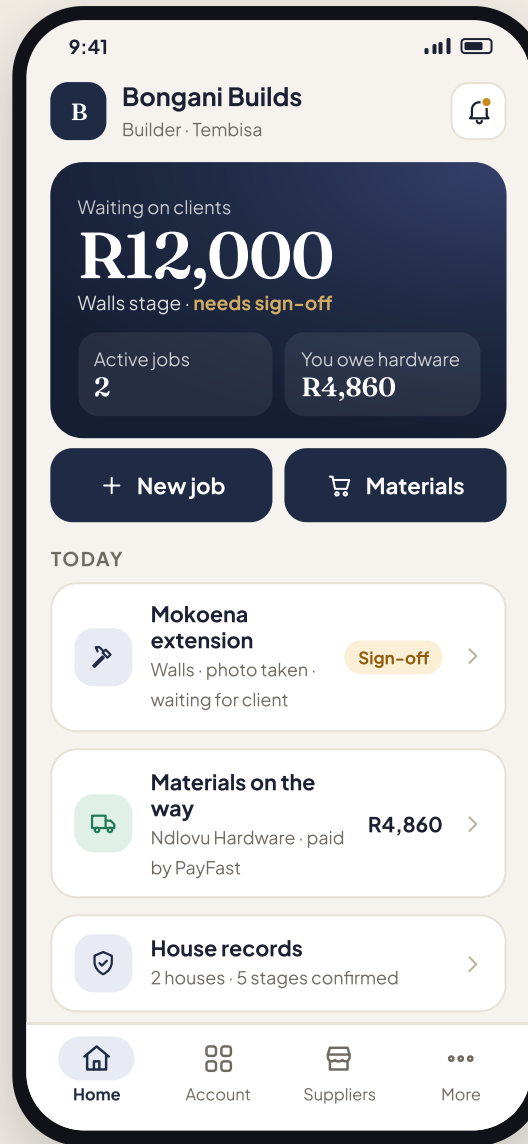

Top bar: the business and the bell. Bottom bar: Home · Account · Suppliers · More.

KasiFlow

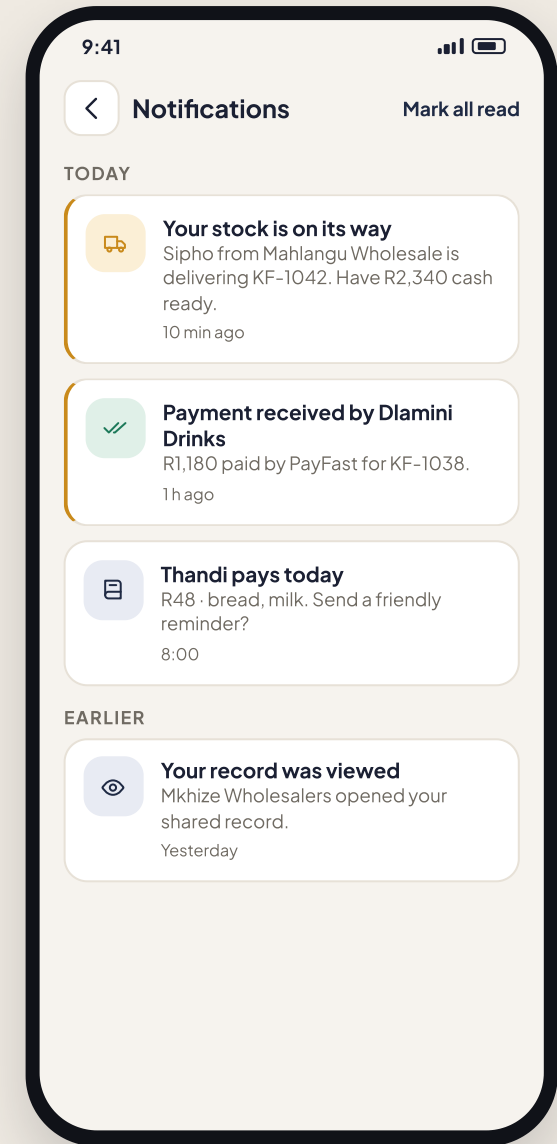

Home · spaza

The number that matters most, two quick actions, then only what needs attention today.

Home · builder

Same layout, different number: money waiting on clients.

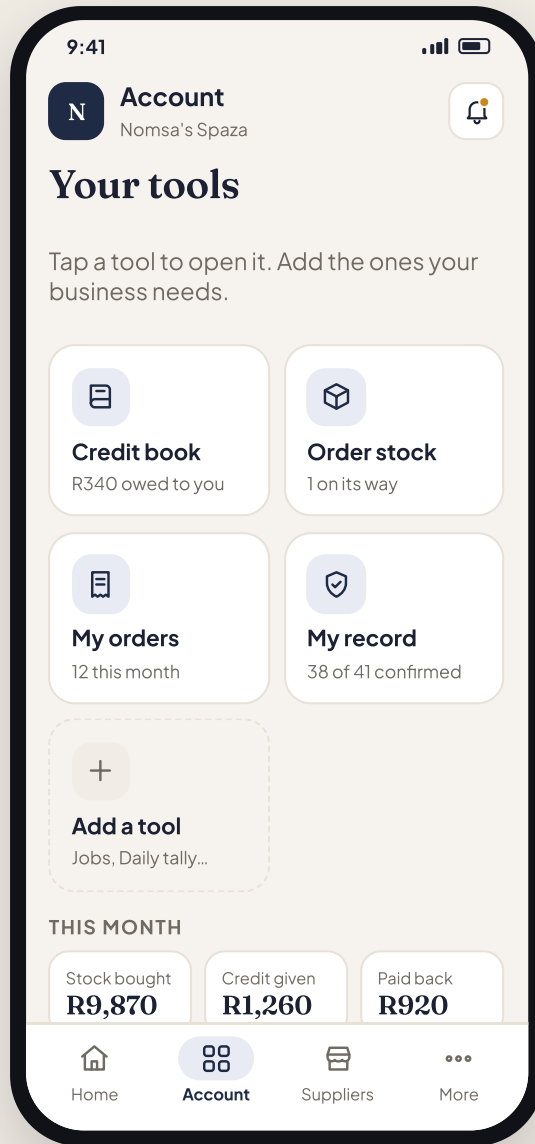

Notifications

Deliveries, payments, who pays today, record views.

Account • the tools

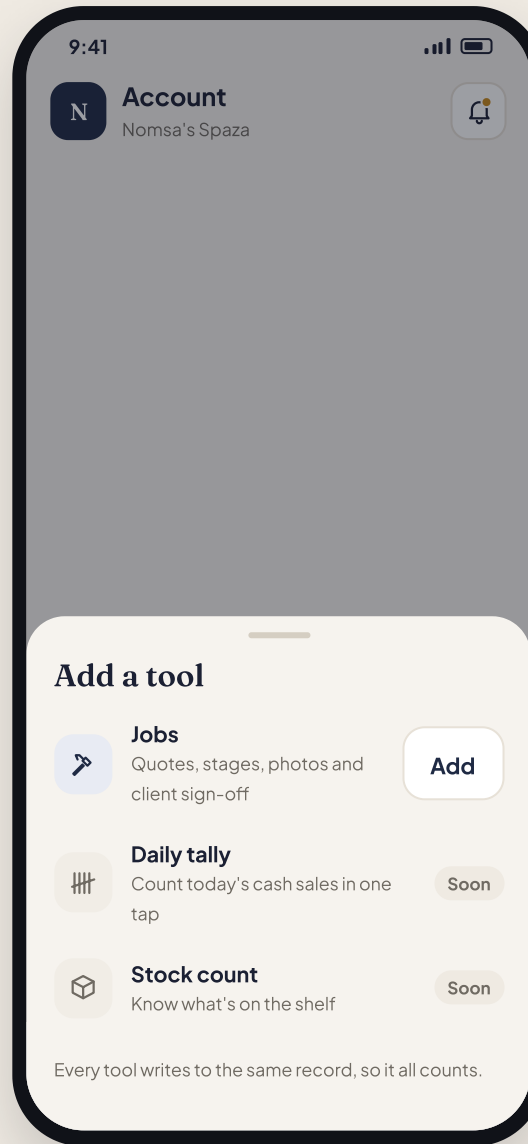

Every tool is a mini-app on shared services: one identity, one confirm, one record.

KasiFlow

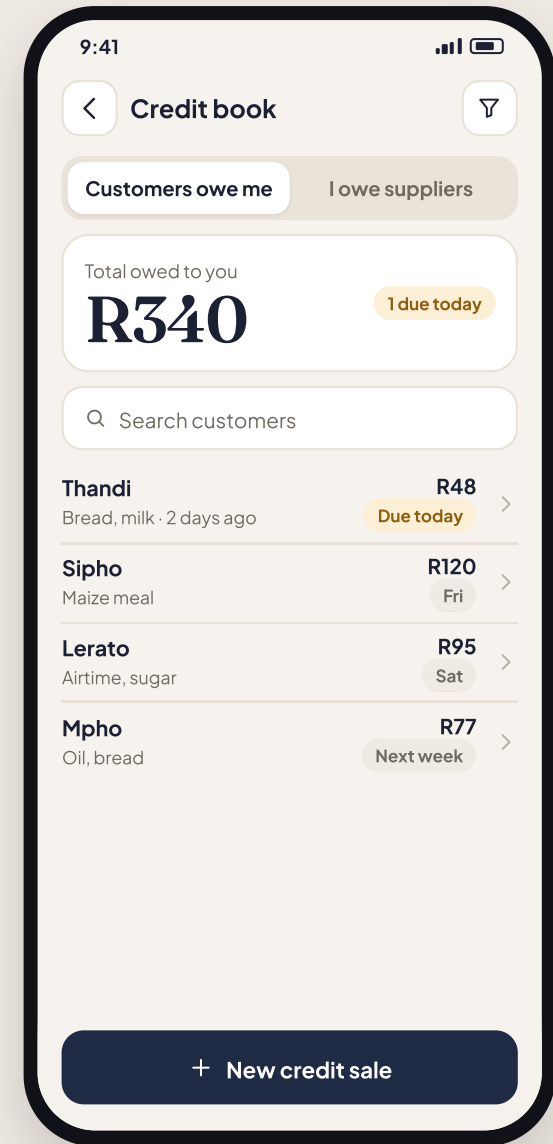

Account tab

The tools the trader chose, with a live line each, plus this month's totals.

Add a tool

Tools are added, not assigned. Everything writes to the same record.

Credit book

Who owes what, and who's due today. The paper notebook, replaced.

Credit book (cont.)

📩 Send Thandi a thank-you receipt ☒

Recorded by you. If Thandi joins KasiFlow, repayments can be confirmed by both.

✓ Save payment

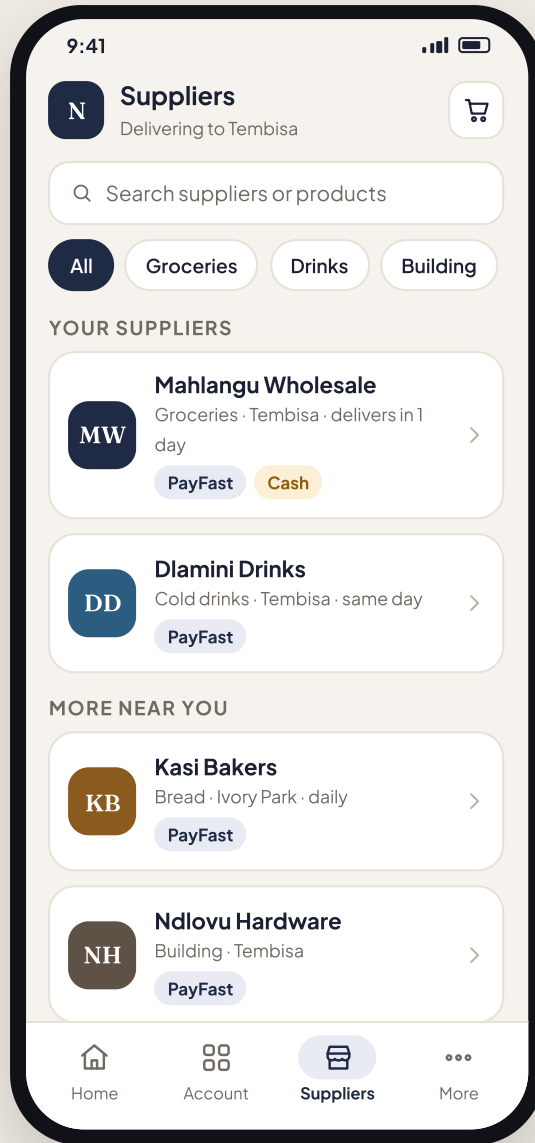

Record a payment

Cash only: PayFast is for ordering from suppliers.
Recorded by the trader.

Suppliers • browse

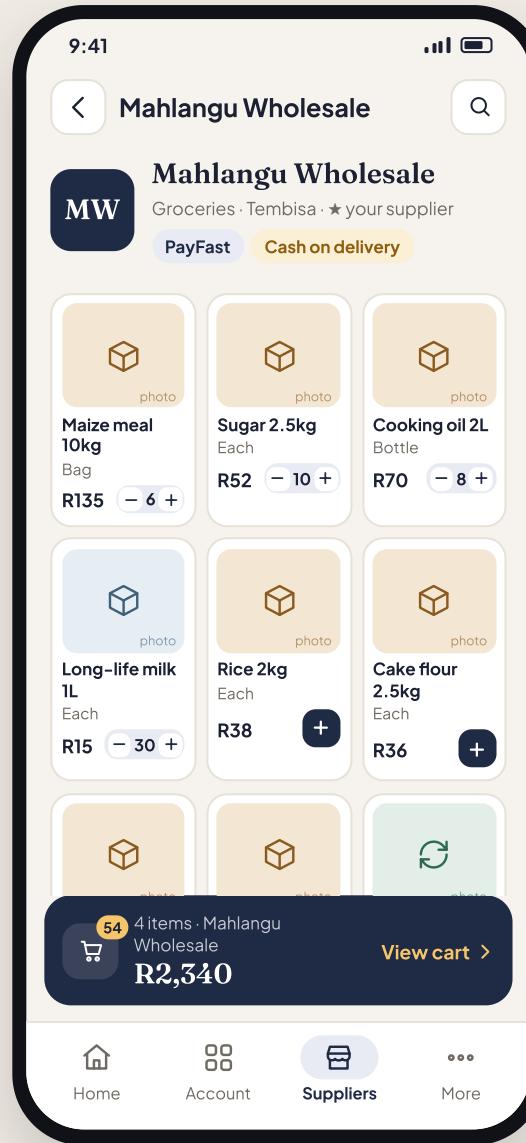

3–5 suppliers loaded through our integration. Each shows how it accepts payment.

KasiFlow

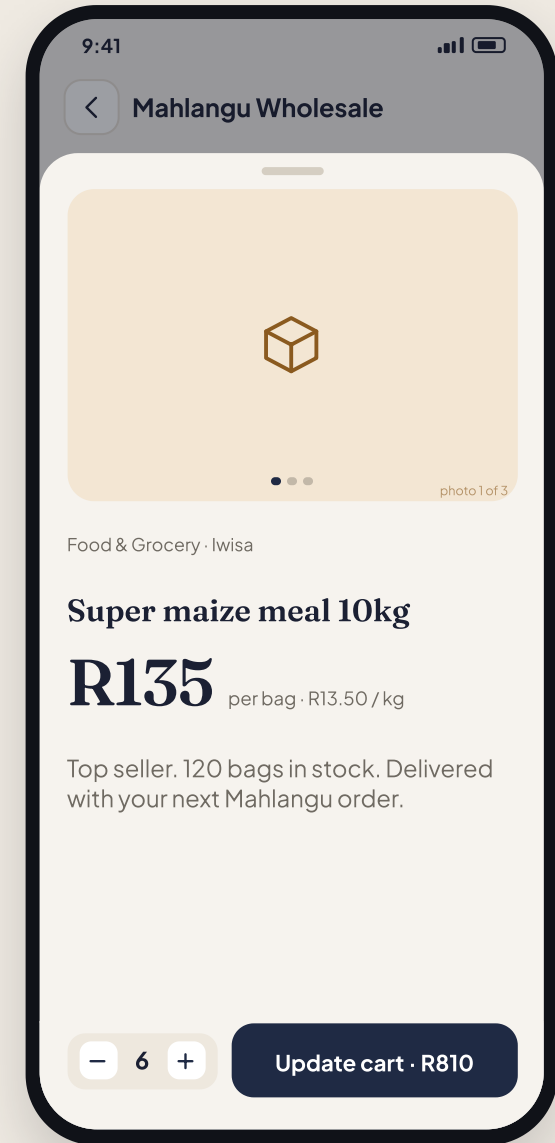

Suppliers tab

Your suppliers first, then others near you. PayFast / Cash tags on every card.

Supplier store

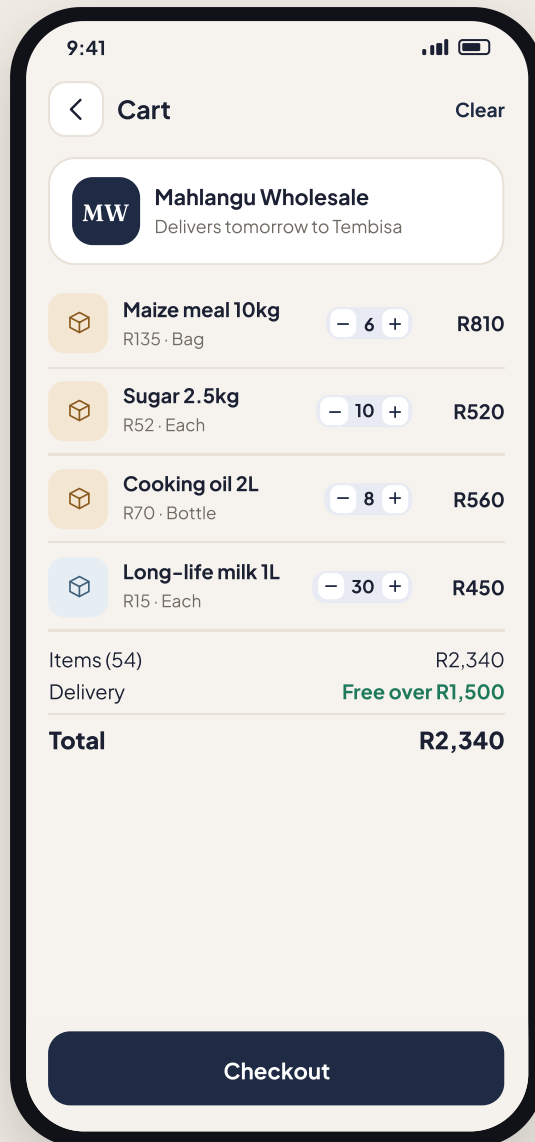

Category chips, then a 3 × 3 product grid. The cart bar follows you.

Product

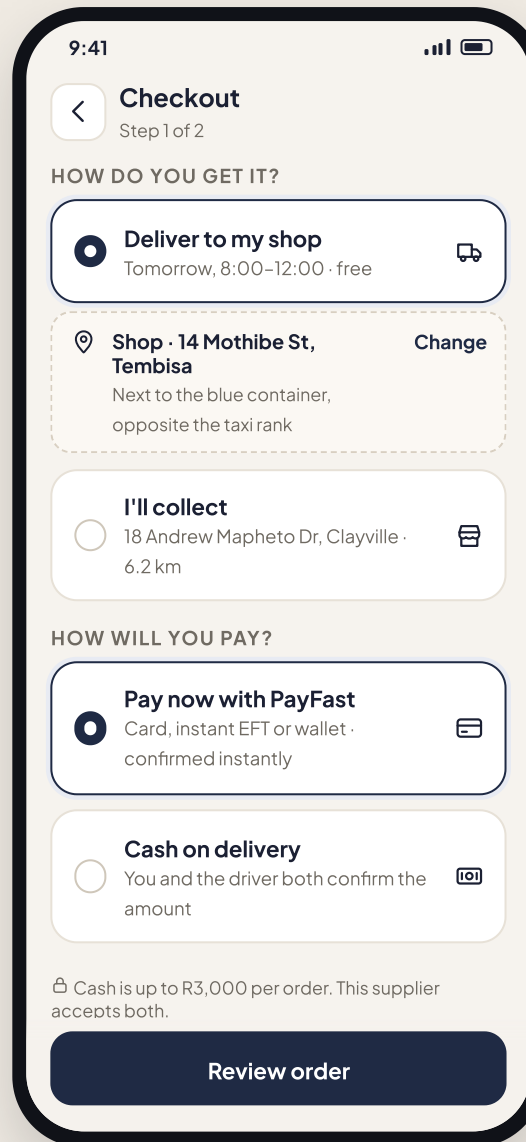

Photos (up to 5), price per unit, quantity, add to cart.

Suppliers • cart and checkout

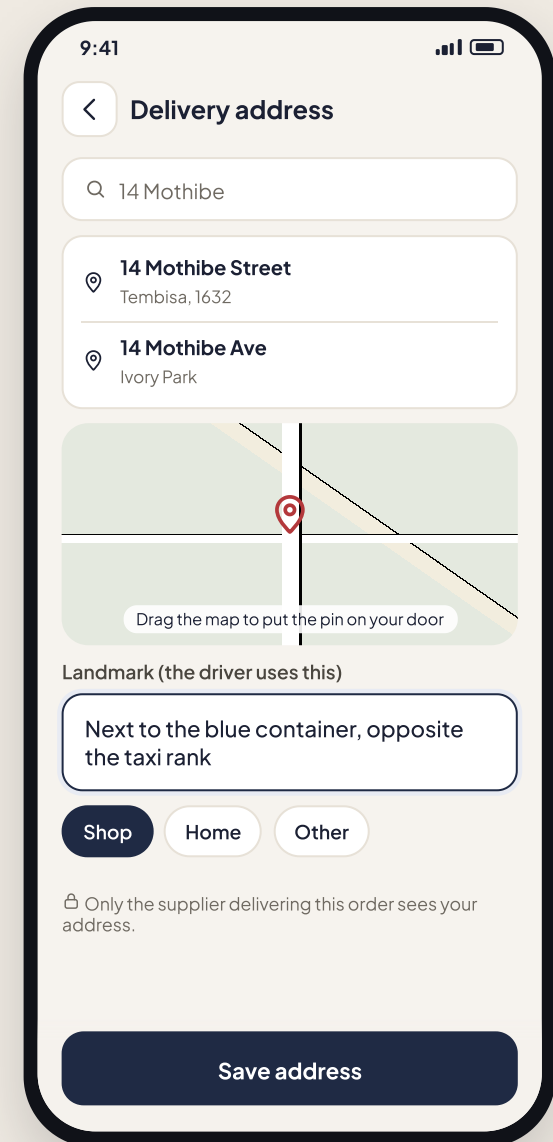

Cart

One supplier per cart. Quantities adjustable; totals always visible.

Checkout

Deliver or collect. Then CASH or PAYFAST, only if the supplier accepts both.

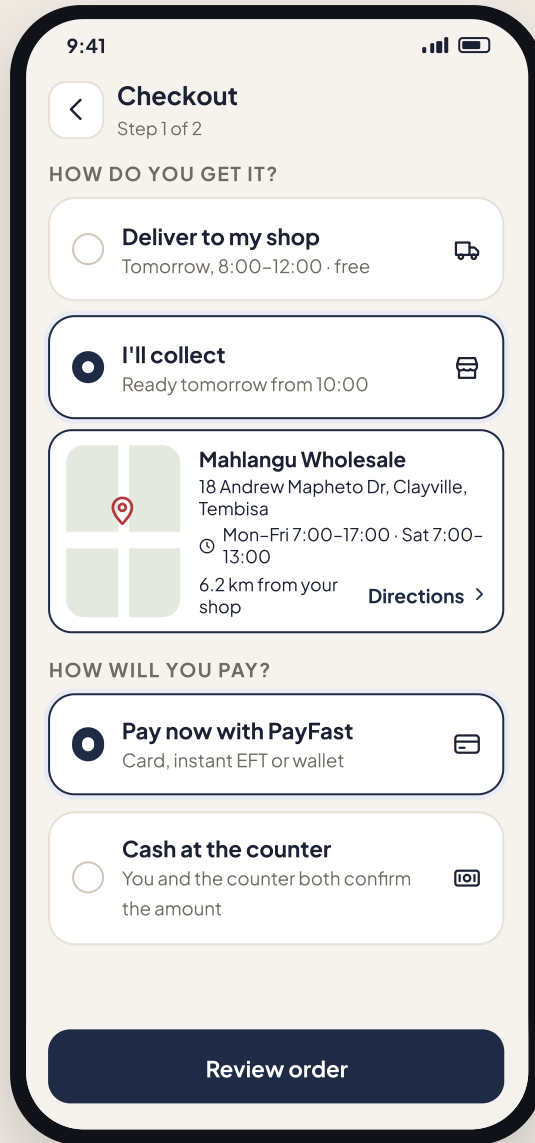

Delivery address

Search, a pin, and a required landmark note the driver actually uses.

Suppliers • collecting instead

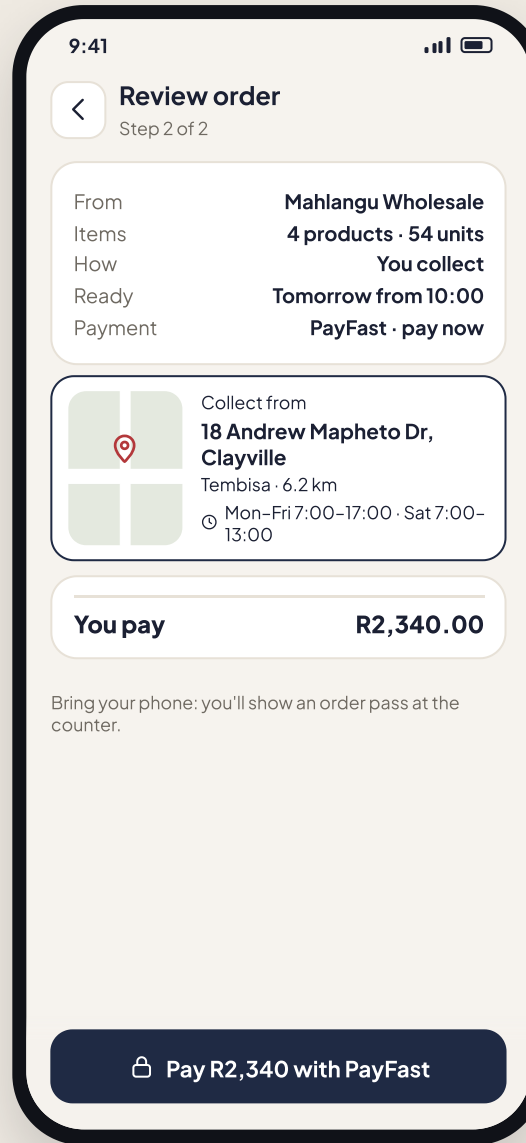

When the trader collects, the supplier's address and hours are on every step.

KasiFlow

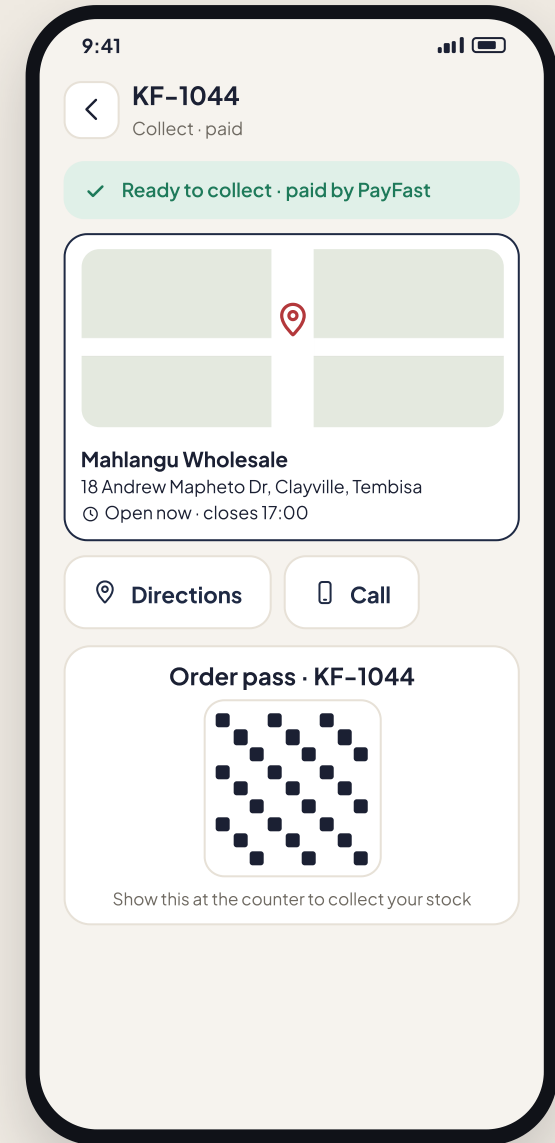

Checkout • collect

Choosing I'll collect shows where, when it's open, how far, and directions.

Review • collect

The collection address and hours again, right before paying.

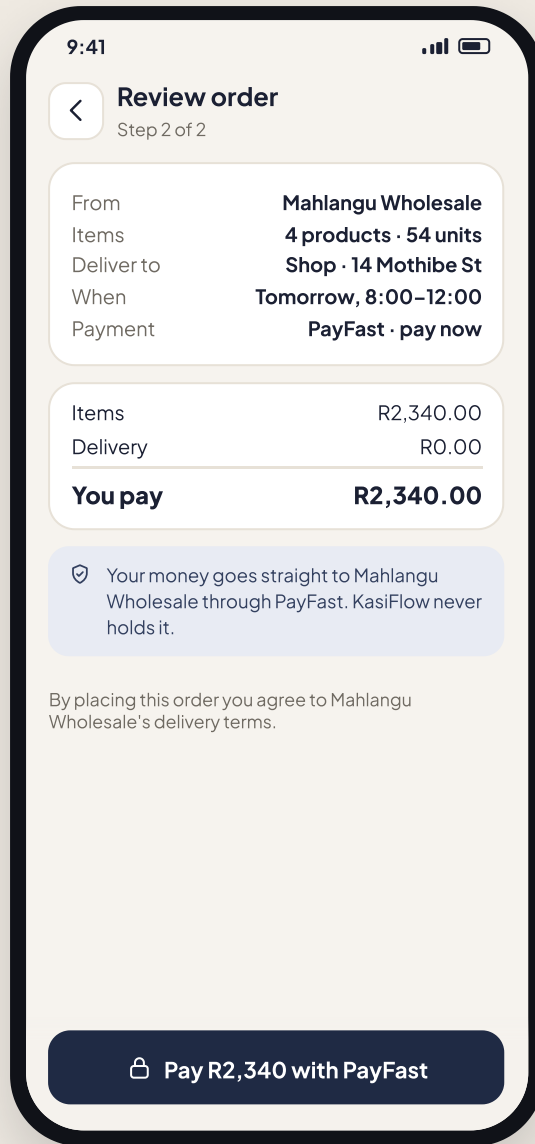

Ready to collect

Address, opening hours, directions and call, plus the order pass for the counter.

Suppliers • pay with PayFast

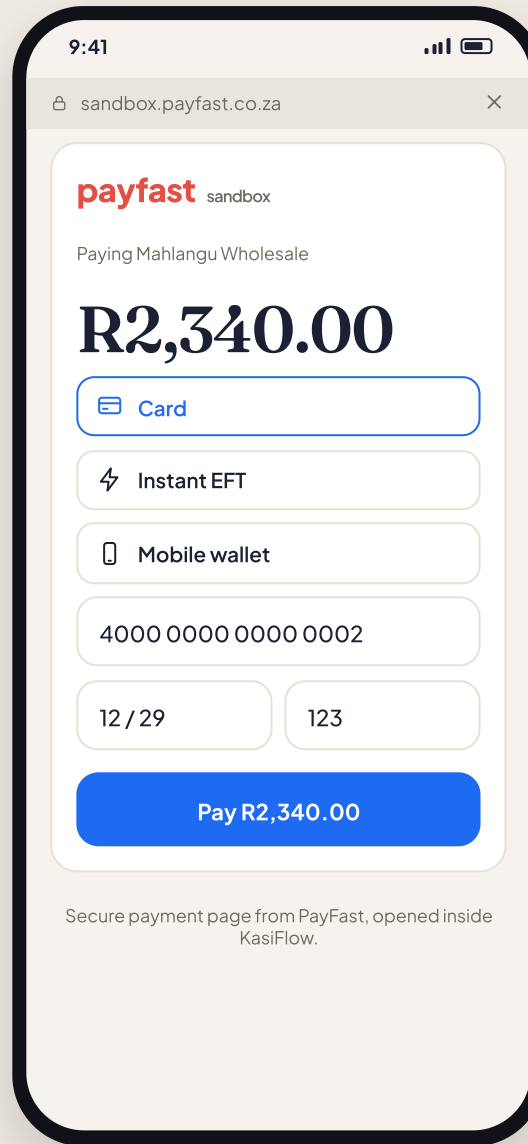

The path that earns the credit: money goes straight to the supplier.

KasiFlow

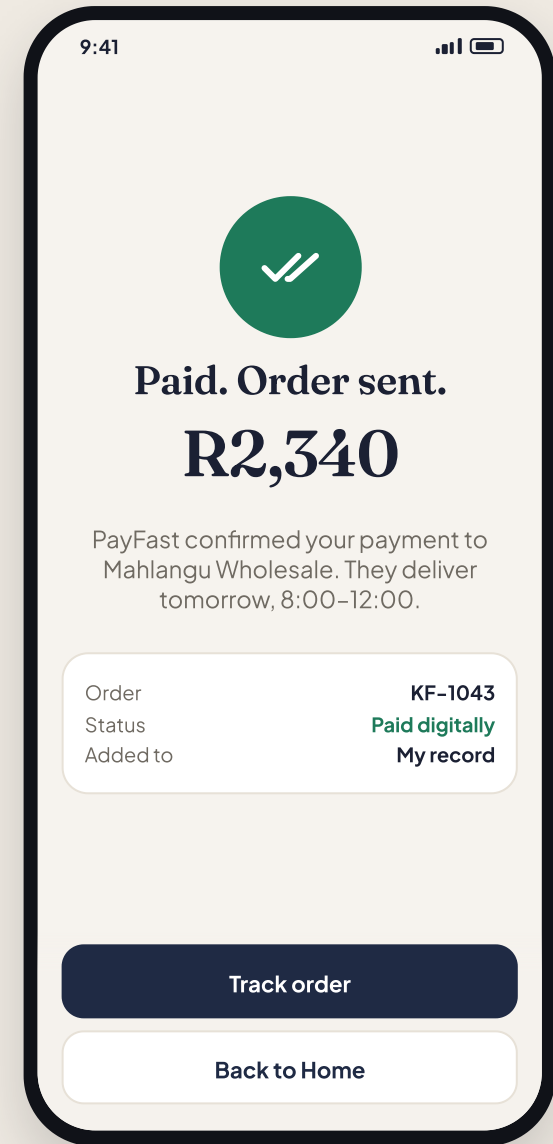

Review order

Everything on one card before paying. "KasiFlow never holds your money."

PayFast

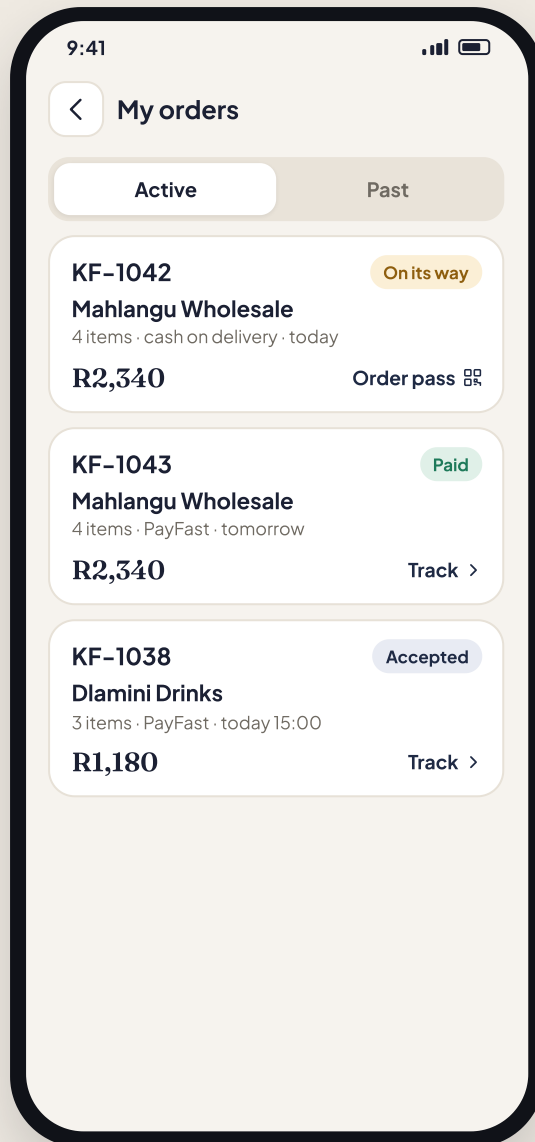

PayFast's own secure page, inside the app (sandbox for the demo).

Paid

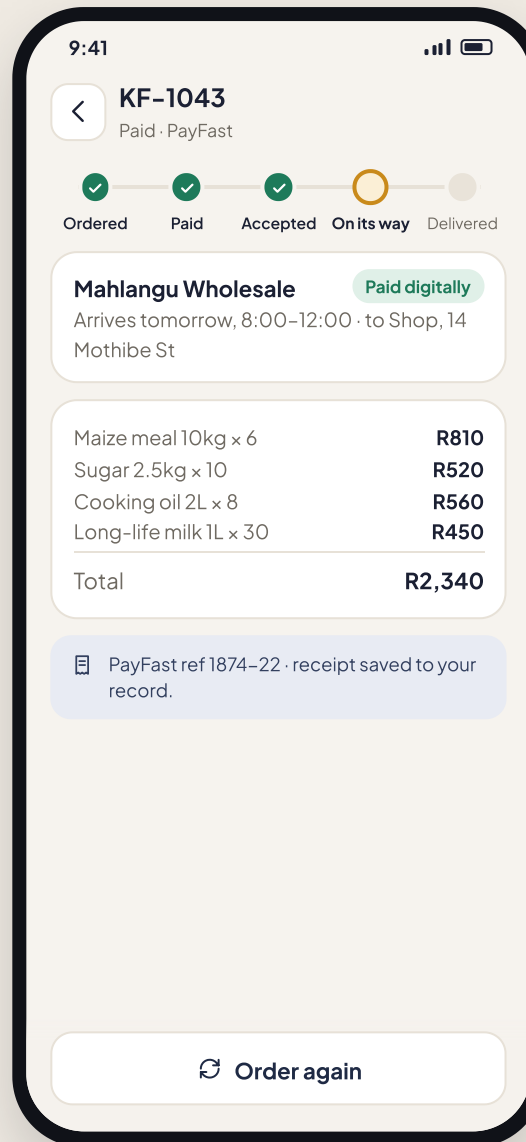

Only shown once PayFast tells our server. The order is on the record.

Orders

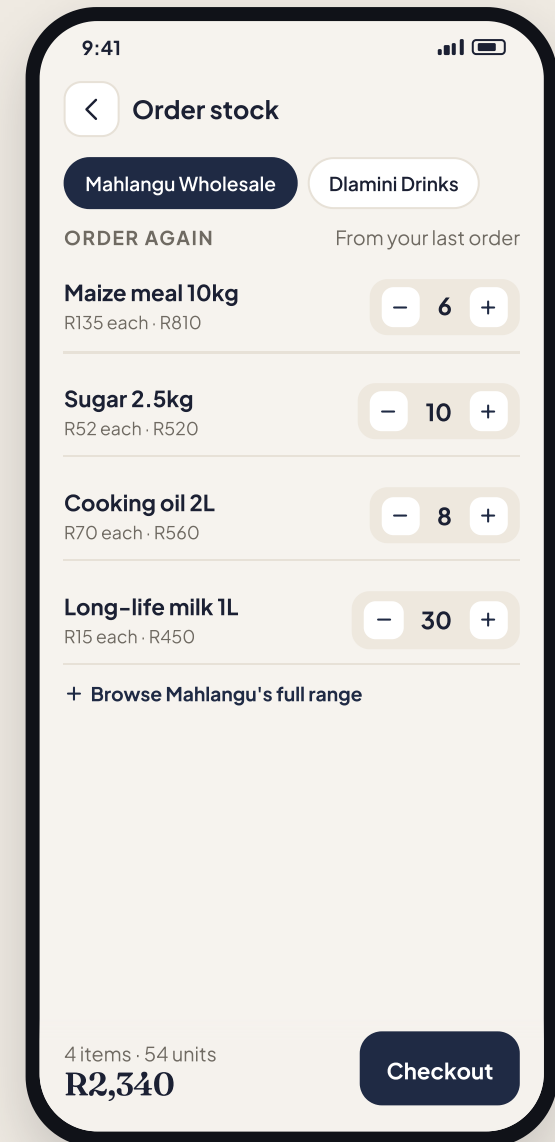

My orders

Active and past. Cash orders carry their order pass.

Order detail

Progress steps, what was ordered, the PayFast reference.

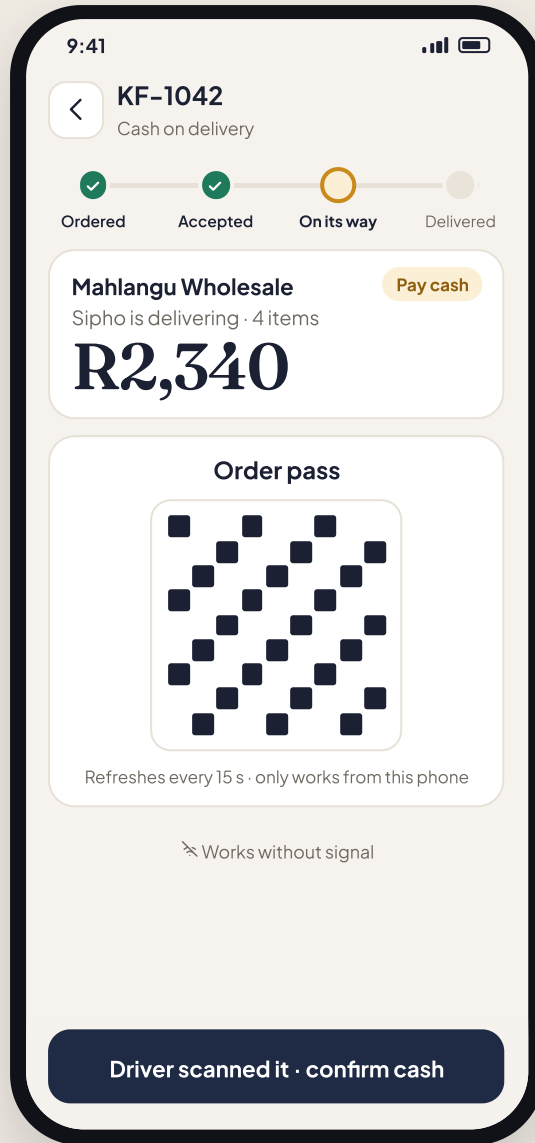

Order again

The fastest path for a spaza: last order, adjust, checkout.

Cash on delivery · the showcase

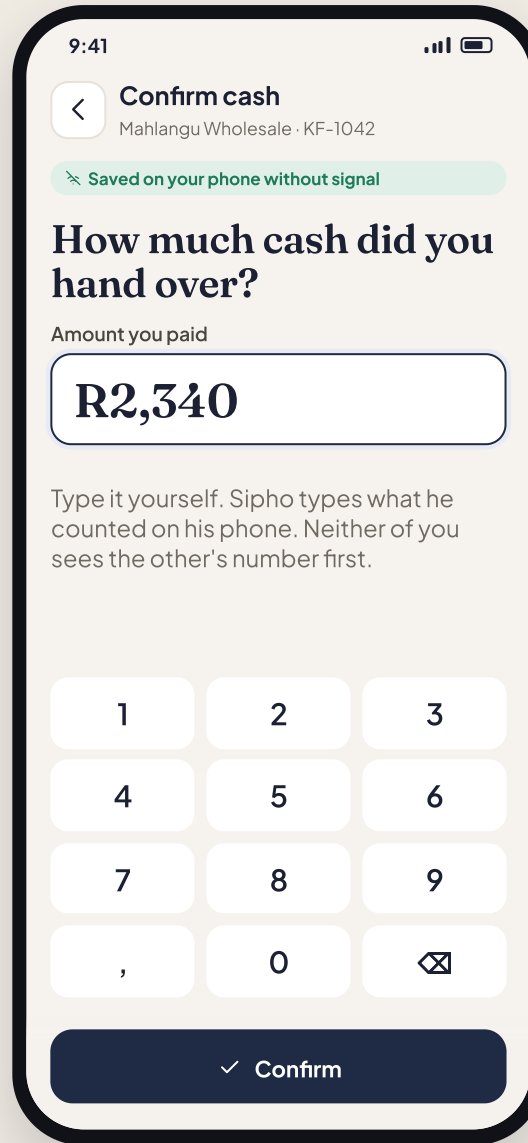

For suppliers that accept cash. Both sides type the amount; the match is sealed.

KasiFlow

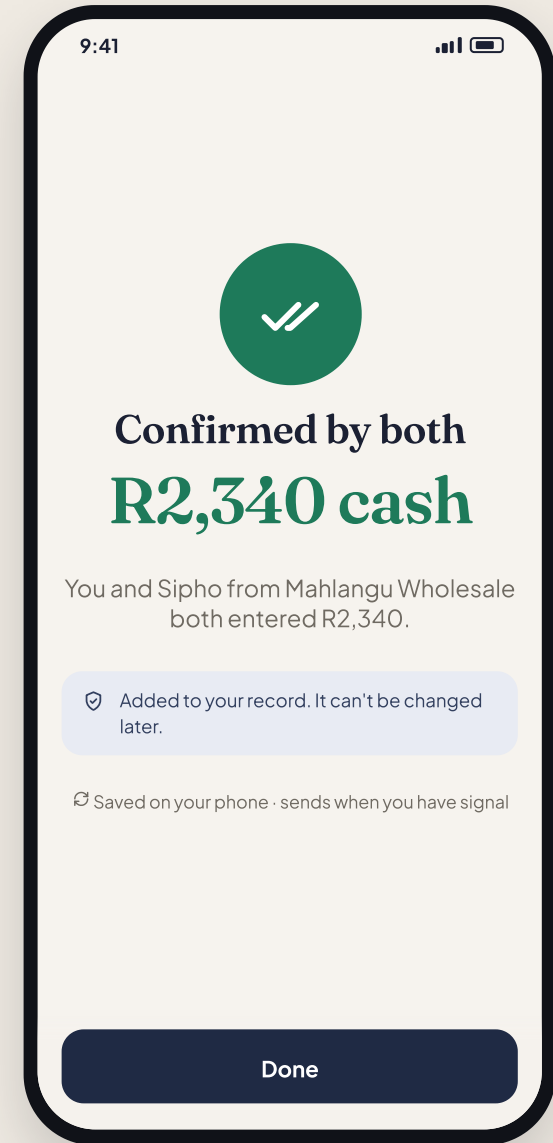

Order pass

A signed QR that refreshes every 15 s and only works from this phone.

Confirm cash

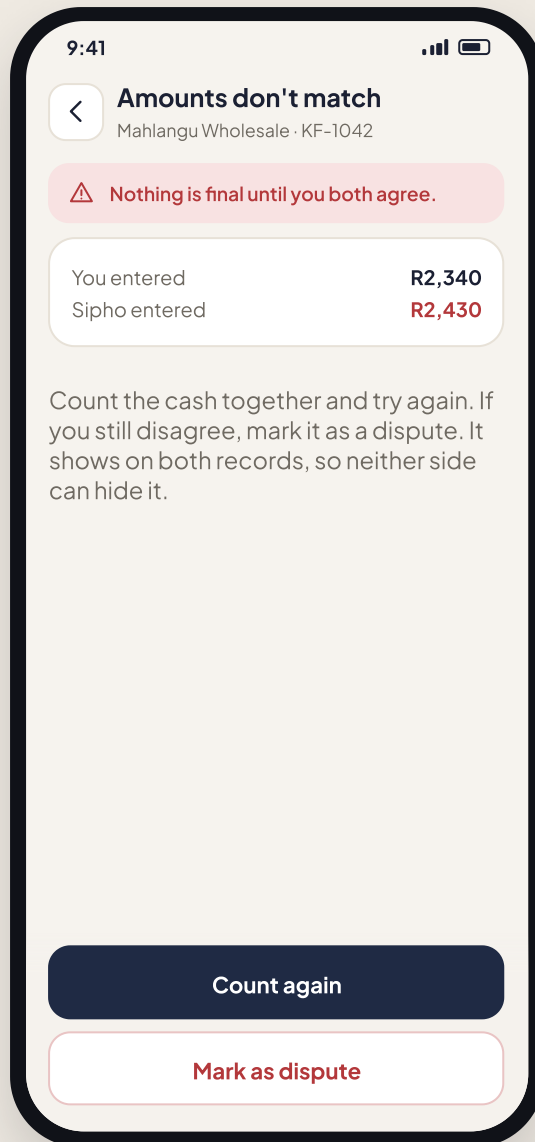

The trader types what they handed over, without seeing the driver's number.

Confirmed by both

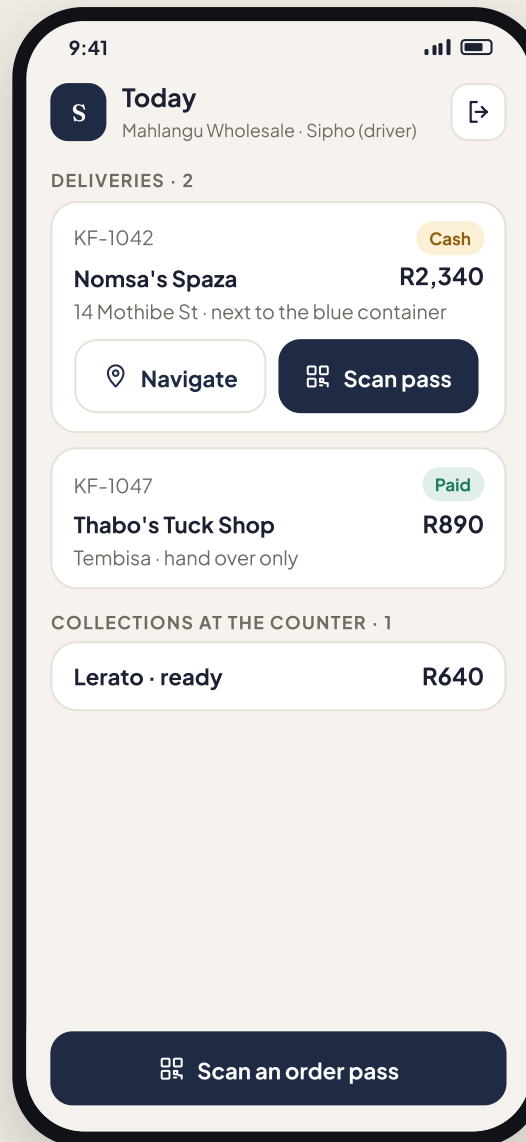

Saved offline, sent when there's signal, can't be changed.

Cash • the other side

Amounts don't match

Nothing is final until both agree. A dispute shows on both records.

Driver • Today

The driver's one screen: deliveries, Navigate, Scan pass.

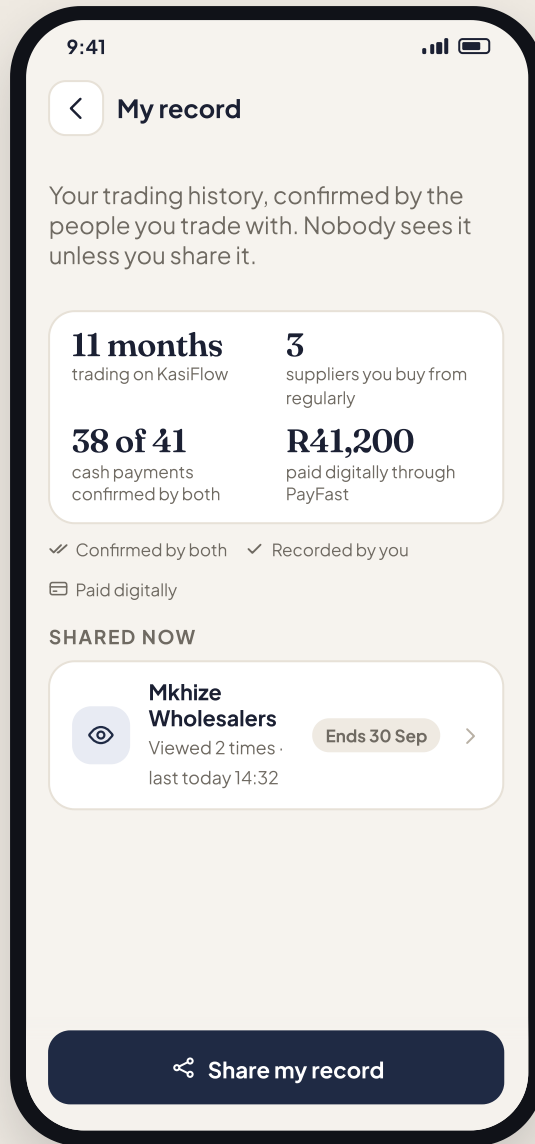

Driver • scan

The pass is checked offline, then the driver types what they counted.

My record

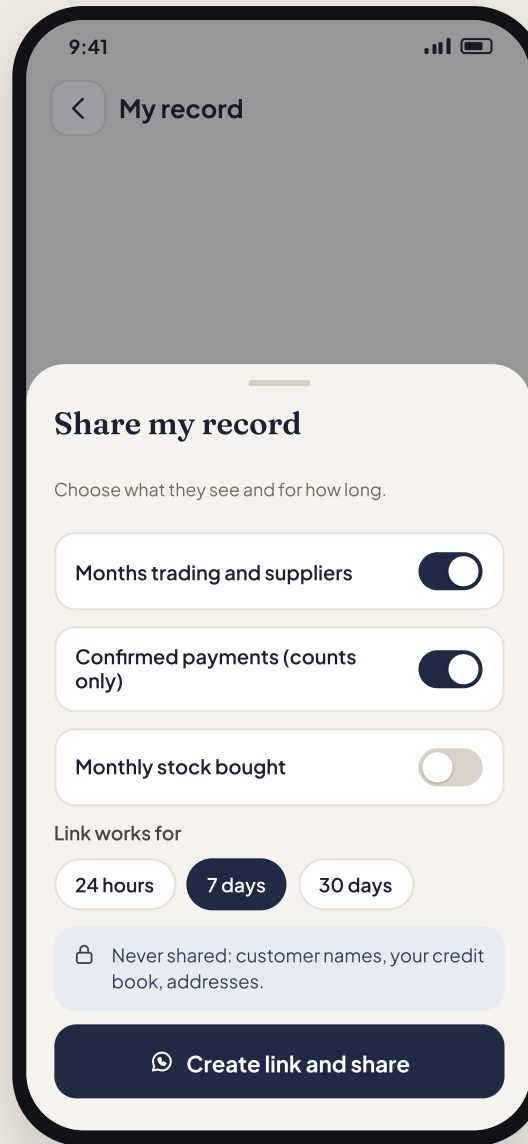

The trader owns it. Nobody sees it unless they share it, and they can stop.

KasiFlow

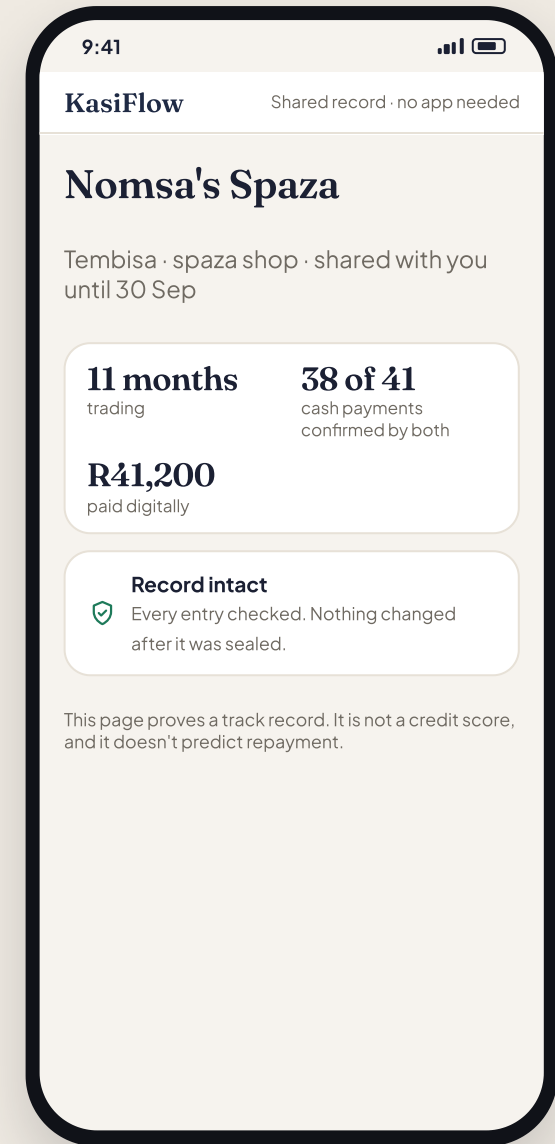

My record

Months trading, suppliers, cash confirmed by both, paid digitally.

Share

Choose what's included and for how long. Private things are never shared.

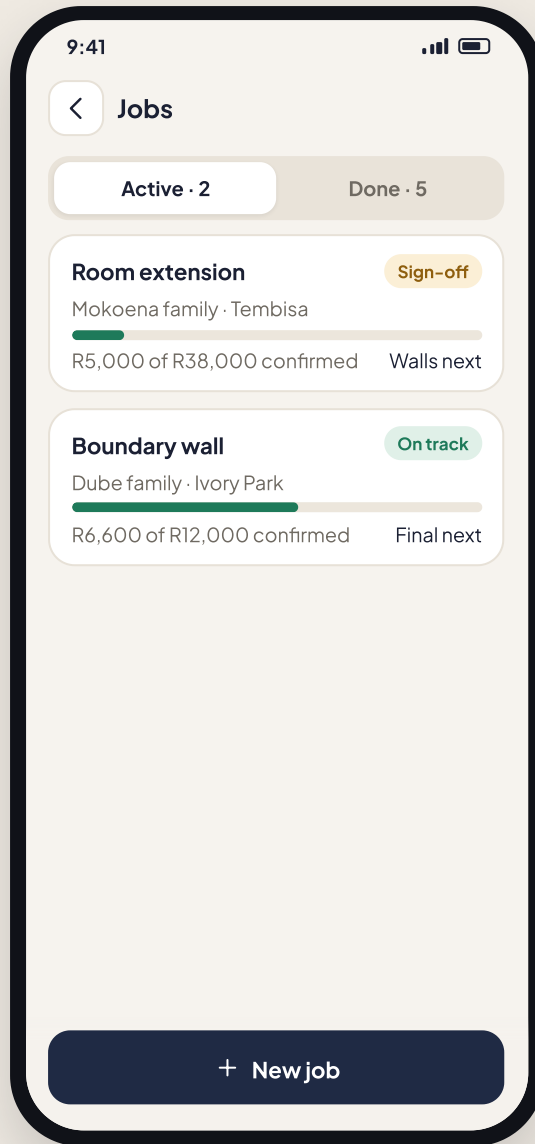

What the viewer sees

A web page, no app. Says what it proves, and what it doesn't.

Builder

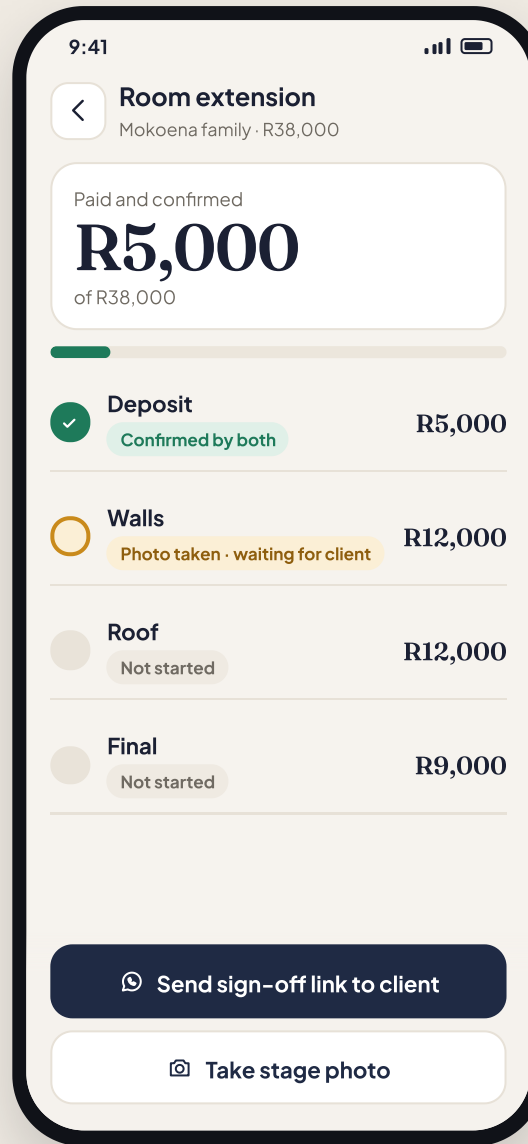

Second priority after the spaza. Same app, same record.

KasiFlow

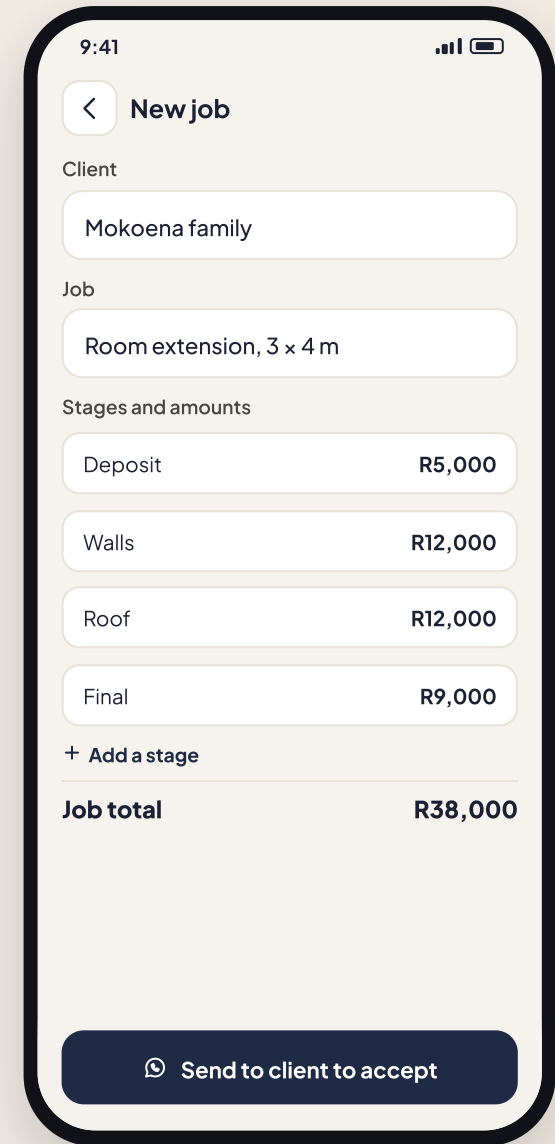

Jobs

Each job with how much is confirmed and what's next.

Job

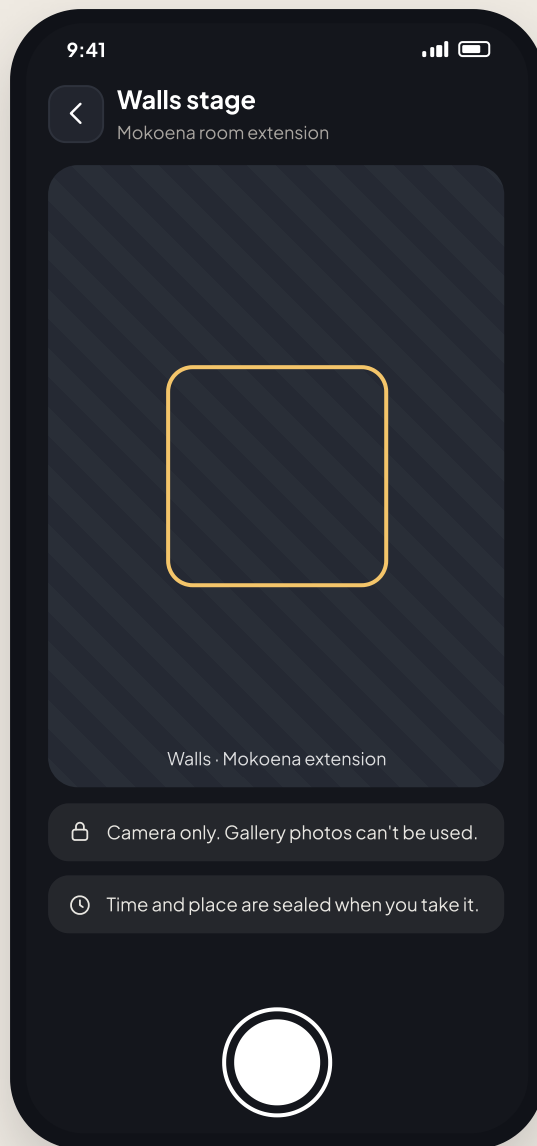

Stages with amounts and status. Send a sign-off link, take a stage photo.

New job

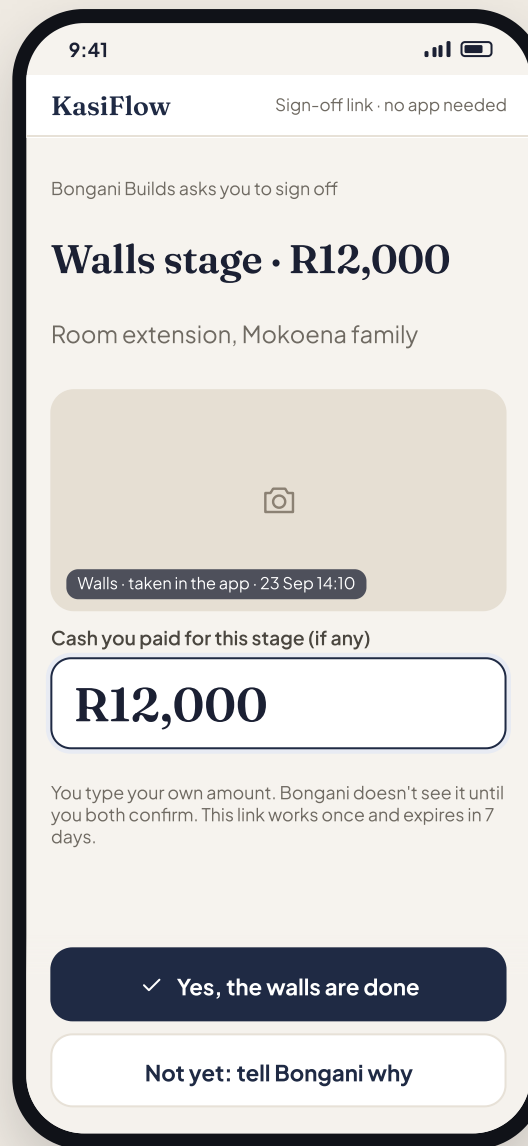

Client, job, stages and amounts. Sent to the client to accept.

Builder (cont.)

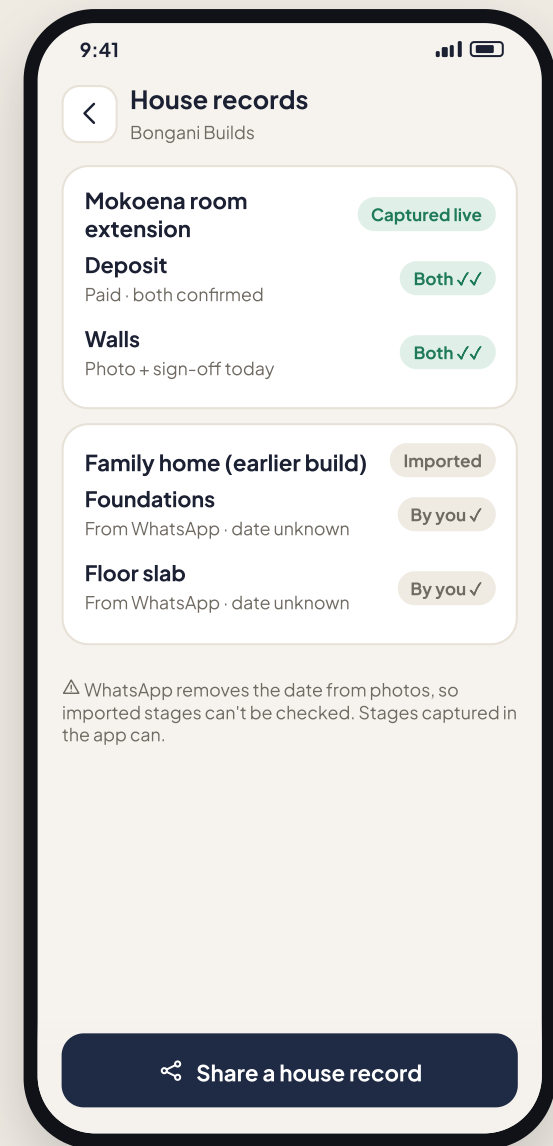

Stage photo

Camera only. Time sealed. Gallery photos can't be used.

Client sign-off (web)

No app needed. One use, 7 days. The client types their own amount.

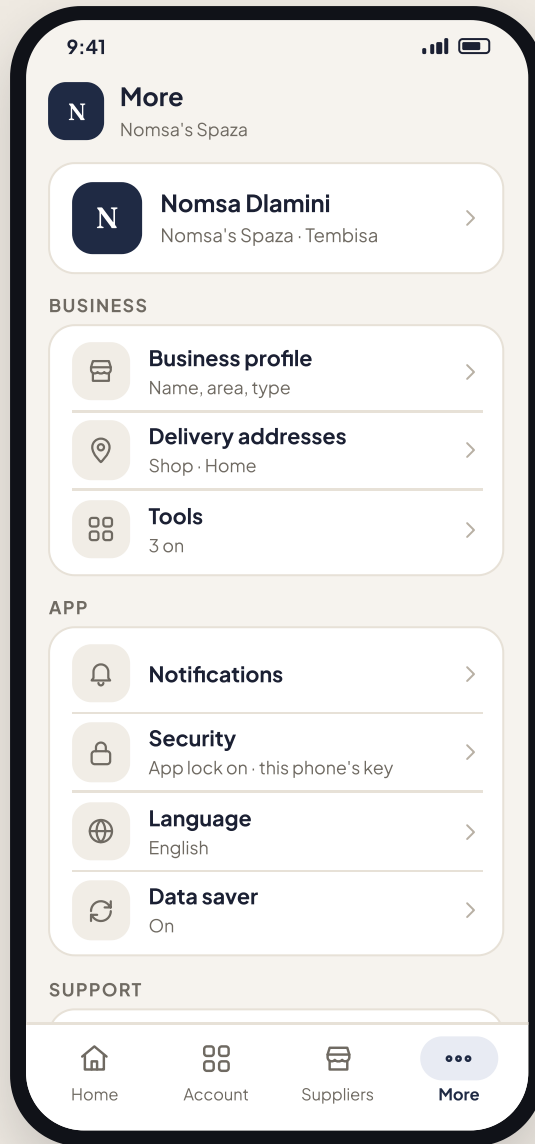

House records

Live stages confirmed by both; imported ones honestly marked "by you".

More and settings

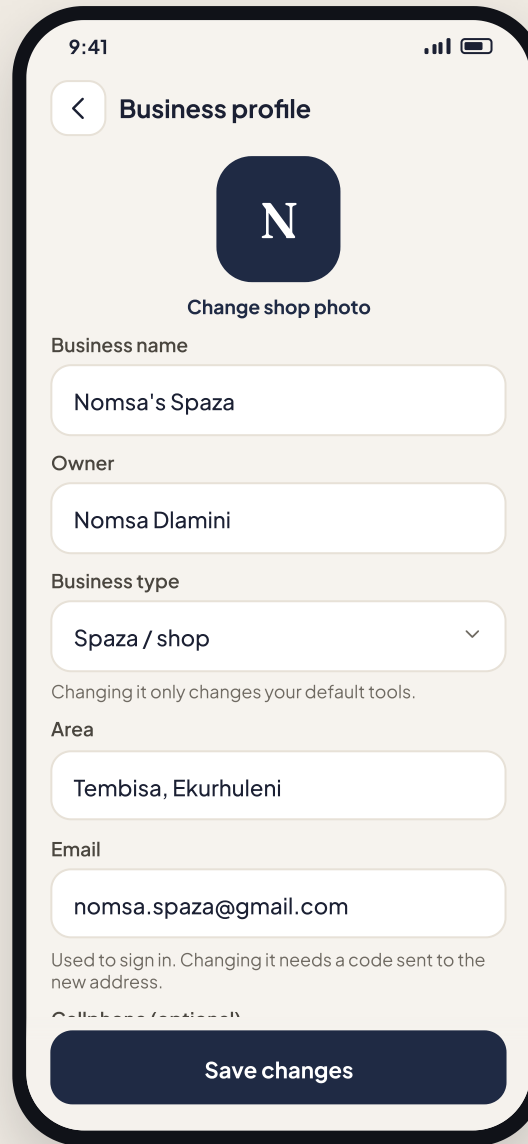

Everything that isn't daily work.

KasiFlow

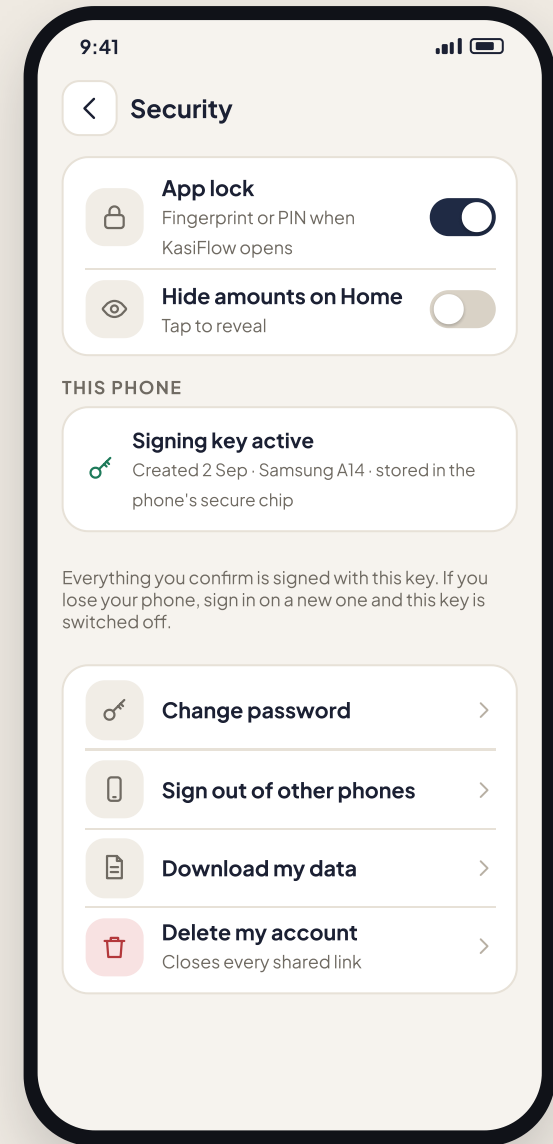

More tab

Profile, business, app settings, support, log out.

Business profile

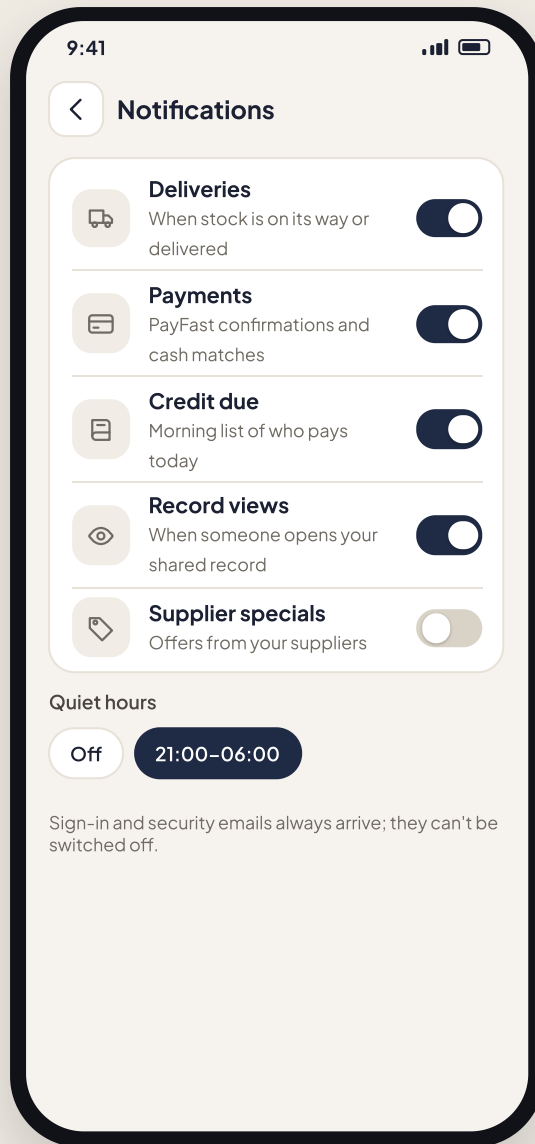

Name, owner, type, area, phone.

Security

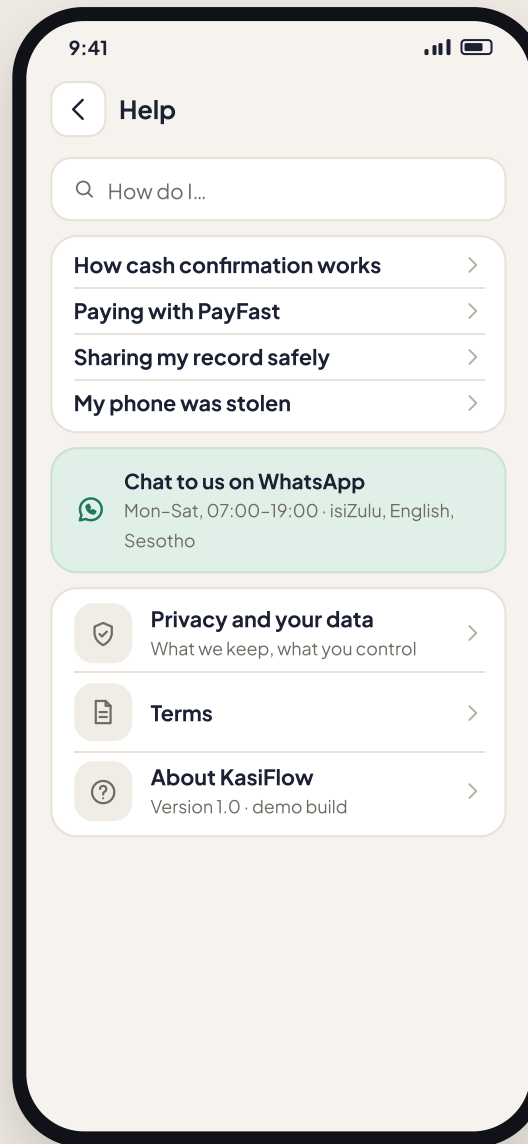

App lock, this phone's signing key, stolen phone, delete account.

More (cont.)

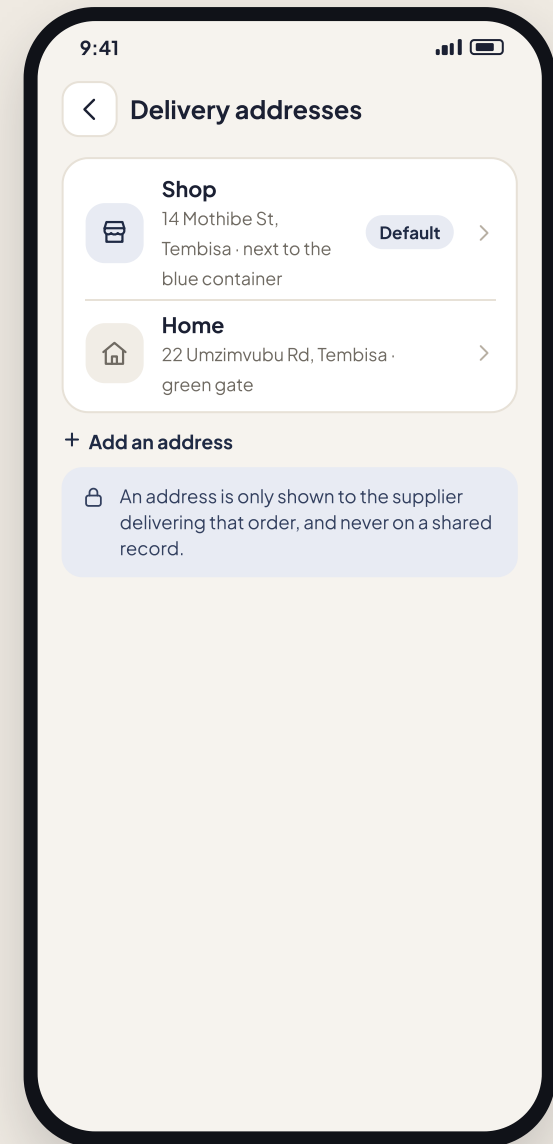

Notification settings

Each kind on or off, plus quiet hours.

Help

Short guides and WhatsApp support in local languages.

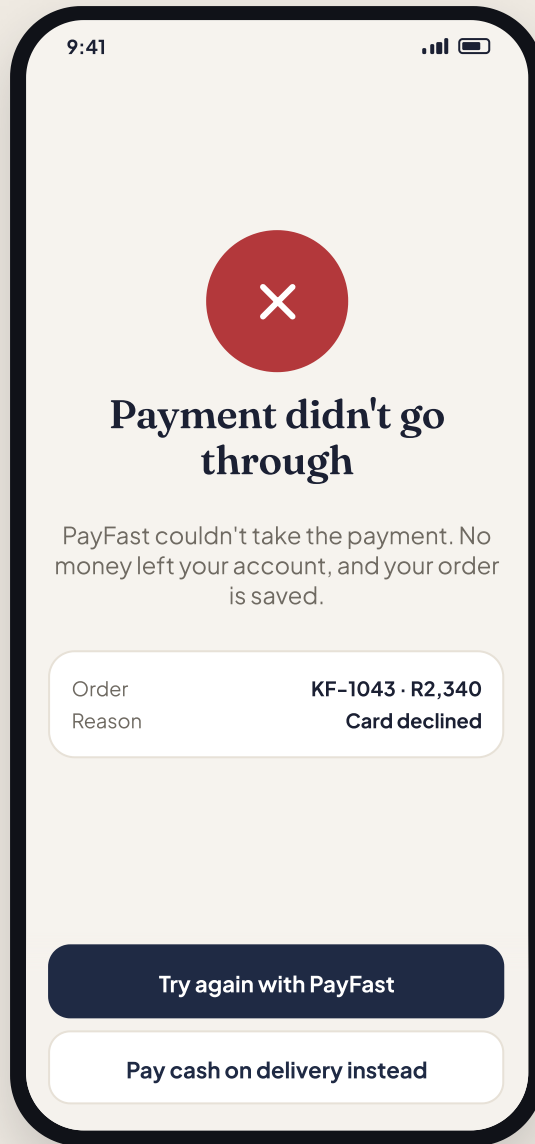

Delivery addresses

Saved places with their landmark notes. Private to each delivery.

When things go wrong

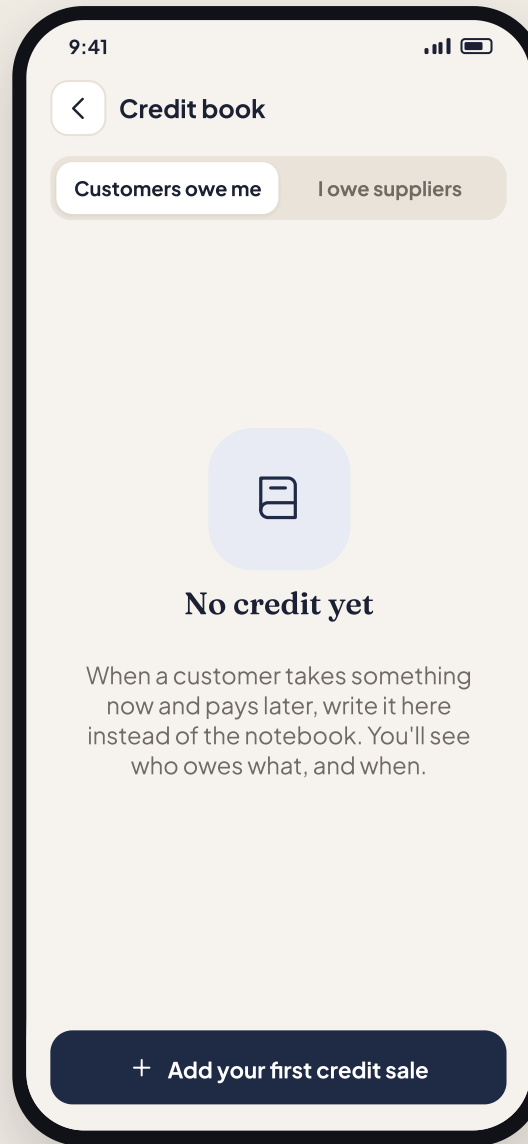

Every failure says what happened, what didn't, and what to do next.

KasiFlow

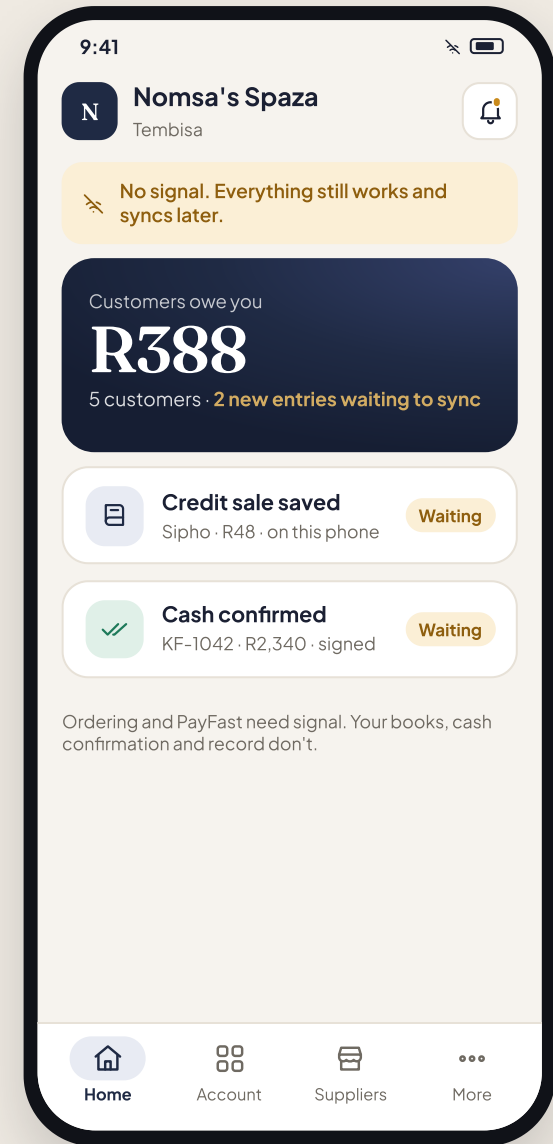

Payment failed

No money moved; the order is saved; try again or switch to cash.

Empty credit book

Teaches the tool instead of showing nothing.

Offline

Queued entries are visible, so nothing feels lost.
